EUROSTAT

PIONEER IN THE ELECTROSTATIC

Eurostat is a pioneer in protection against electrostatic discharges (ESD). We offer solutions for protection of components sensitive to electrostatic damage and contamination during production, storing and shipping.

PROTECTION OF DISCHARGES

WHAT ARE ELECTROSTATIC DISCHARGES?

All materials are composed of atoms. Each atom is composed of a positive charge, around which gravitate many negative electrons. At rest, positive nucleus charges are equal to the sum of negative charges of the electrons that gravitate around them. The charge therefore remains neutral. Static electricity is a phenomenon which happens when two surfaces contact each other and are then separated. It's at this moment that an exchange in electrons between both surfaces can occur. At this moment occurs a movement of electrons that creates charges at the surface of both materials.

This exchange of electrons between conductive materials (and man made materials) can occur suddenly, creating an electrostatic discharge with irreversible damage, especially to electrical components.

In order to avoid those damages, it is necessary to implement the protective measures aiming elimination of all static electricity sources and consequently, prevention of the electrostatic discharges. Nevertheless, if the static discharges appear, Eurostat has developed a whole range of materials and products, providing protection for electrostatic sensitive devices such as PCBs.

Conductive

Allows a rapid discharge to ground that can have the same effect as an ESD discharge. These materials insure a bond with ground but do not mitigate the energy exchanged during a discharge.

Grounding resistance less than
 $R_s/R_v < 1 \times 10^4 \Omega$

Dissipative

Allows a slower discharge from the charge carrier to the ground, reducing the risk of potential damage.

Grounding resistance is between $10^4 < R_s/R_v < 1 \times 10^{11} \Omega$

Insulative

Offers no grounding of electrostatic charges.

Offer no grounding of electrostatic charges
 $R_s/R_v > 1 \times 10^{11} \Omega$

EPA ORGANIZATION

Eurostat provides a wide range of products and consumables for production in ESD protected areas (EPA) and warehouses, to protect against electrostatic discharges.

EQUIPPING AN EPA

The necessary equipment to protect a production area is as follows:

- A workbench
- A fabric or vinyl chair (vinyl for clean rooms),
- A table mat,
- A wrist strap/cord
- A universal terminal to ground the wrist strap, if possible with an earth bonding point under the workbench,
- A grounding terminal plate to ensure the safety of the setup,
- A table ionizer.

Generally, it is recommended to keep 30 cm away any objects that are No -conductive (insulative) or radiating over 5,000 Volts/m or 125 Volts/Inches that are in immediate proximity of sensitive circuits, such as: water bottles, office supplies that can generate ESD, insulative packaging, etc. As well as any cellulose (paper, wood, cardboard...) based elements with a low hygrometry (<40%).

Clothing

As an important factor when it comes to electrostatic discharge generation, all personal must wear suitable ESD clothing that reduces risk of generating electrostatic discharge.

Dissipative lab coats are mandatory; they must not be covered in any insulative element (veil, badge, safety jacket, long hair etc.) and must cover the sleeves of the operator.

The floor

The floor of an EPA zone must be dissipative, and is required to ground the operator. He must be equipped with a strap/cord and proper shoes.

An ESD floor requires special cleaning, to avoid any risks of insulating its ESD properties. For example, you must avoid any cleaning product containing waxes or silicones.

Zone identification

It is important to identify and mark the areas where the workbenches are with appropriate signage on the walls and on the floor:

- Floor adhesive (workspace Identification) or guiding posts
- Signs at the entrances and exits of the EPA zones
- An instrument capable of testing wrist straps and/or shoes must be installed at the entrances of every EPA zone. Operators must test themselves before setting up.
- An instrument capable of ensuring an equal potential link between the operator, his workbench, and the ground.

Every safety or control device must be checked regularly.

ESD PREVENTION EQUIPMENT VERIFICATION

Every safety or control device must be checked regularly to be in line with the IEC 61340 norm.

- Measuring surface resistance (Tera Ohm meter)
- Measuring electrostatic charges (Field meter)

Each device must be calibrated every year in order to stay compliant with the IEC 61340 norm. Eurostat offers this service.

TRAINING

All staff must be aware of the risks that electrostatic discharges represent.

Eurostat offers 3 levels of training, from operator to ESD coordinator, to ensure that all staff follows good practices to be used within the EPA.

GLOSSARY

ABS: Acrylonitrile-Butadiene-Styrene

APET: Amorphous Polyethylene Terephthalate

Carbon Nanotubes: Two dimensional layers of carbon atoms, providing conductivity or dissipation to PS matrix, depending on concentration in the material

CPM: Charge Plate Monitor measures voltages applied to it's sensing plate.

Directive RoHS: European Directive: Limiting the use of certain dangerous substances in association with electrical and electronic components

EMI: Electromagnetic interference

EPA: Electrostatic Protected Area (An area of complete ESD protection)

ESD: Electro-static Discharge

European Standard IEC 61340-5-1: Protection of electro static sensitive devices

LDPE, HDPE: Low density PolyEthylene, High density PolyEthylene

PC: PolyCarbonate

PCB: printed circuit board

PE: PolyEthylene

PP: PolyPropylene

PS: PolyStyrene

PU: PolyUrethane

RV (volume resistance): Resistance test between the surfaces of a material

RS (surface resistance): Measurement taken from the surface area of a material

Shielding: Material offering a Faraday cage

SMD: Surface Mount Devices

Standards EIA-583 / EIA-541 /EIA-625: Standards related to the packaging of humidity sensitive parts

TPU: Thermoplastic Polyurethanes

VCI: Vapor Corrosion Inhibitor

MVTR: Moisture Vapor Transmission Rate

Build your Workbench

Technical data:

- Alliance motorized series
- Version without motorized height adjustment available.
- Delivered as a kit: Table, 1st shelf, lights or led lights, perforated panel
- Temperature resistance: 300 °C
- Complementary element can be added.
- Workstations can be joined in a row or back-to-back which reduces costs.
- ESD properties
- Power Panel

MOTORIZED VERSION

- **Motorized height adjustment (button):** 700 - 950 mm
- **Speed:** 3 mm/s

d. Field service kit

Dedicated to a technician operating on site.

Kit includes:

- High quality static dissipative work surface 54 x 61 cm
- 16.6cm x 23.6 when folded in pouch
- Adjustable fabric 10mm stud wrist strap
- Grounding cord connection for wrist strap/mat
- Pouch

- Provides efficient static protection in a compact package that fits easily into most tool cases.
- Two pockets sewn into the work surface for cords storage.

Thickness mm 0.8

Technical data:

- Dimensions: 540 x 610 mm
- Surface resistance Rs: < $1 \times 10^9 \Omega$
- Volume resistance Rv: < $1 \times 10^9 \Omega$
- Colour: Red

Part Nr. : 31-560-0509 (with pouch)

4.2. Floors

a. Flexible PVC Slabs

Thickness mm 6.0

Flexible PVC slabs which provide excellent resistance to static and rolling loads. The coating is factory-equipped with a last generation surface treatment for maintenance-friendly, stain-resistant products and decontamination processes.

Technical data:

- Volume resistance $R_v \leq 1 \times 10^9 \Omega$
- Thickness: 6 mm
- Wearlayer thickness: 2 mm
- Weight: 9240 g/m²

- Ground resistance: $1 \times 10^5 < Rv < 1 \times 10^7 \Omega$
- Surface resistance: $1 \times 10^5 < Rs < 1 \times 10^7 \Omega$
- Colour: Black with 2 yellow safety borders

+

Fitted with 2 x 10 mm male grounding studs, 3 m grounding cord with crocodile clip and banana included.

4.4. Acrylic adhesive

Technical data:

- Solvent free
- Capacity: 5 Liters
- Coverage rate (approx.): 4m² per liter
- Storage: between 5°C and 30°C
- To use with floor mats

Part Nr. : 32-990-0002

+

- Permanent or release bond
- High bond strength

4.5. Varnishes

Ultra floor finish

High quality and high performance

IEC 61340
Compliant

Features

- Extended stripping cycle that can last for up to 24 months
- Dries faster and with higher gloss intensity than other ESD finishes
- No other ESD floor finish can match Staticide Ultra for electrical properties, durability and gloss finish
- Maximizes the stripping cycles
- Coverage: 35 to 50 m² per liter
- **Capacity:** Bottle 3,75 liters

Part Nr. :41-100-4600

Acrylic floor finish

Economic acrylic floor finish for EPA

IEC 61340
Compliant

Features

- Designed to provide high performance static control on any sealed or hard surface in manufacturing production areas, Staticide Acrylic Floor Finish is a high solid, solution to protect sensitive manufacturing areas from the dangers of static build up.
- Should be applied once a year after the use of 41-100-4010 stripper and 41-100-000x cleaner (p.41)
- **Capacity:** Bottle 3.75 liters

Part Nr. : 41-100-4000

4.6. Black conductive tubing

Carbon loaded conductive PolyEthylene.

Caution! The use of black conductive PE bags or tubing might be detrimental to electronic components due to the high speed of the electrostatic discharge on the surface.

Thickness $\mu\text{m}(+/- 10\%)$ **100**

IEC 61340
Compliant
ROHS Directive

Technical data:

- Surface resistance $R_s: < 1 \times 10^5 \Omega$
- Volume resistance $R_v: < 1 \times 10^5 \Omega$
- Colour: Black

Can substitute copper and used as a conductive matrix for grounding floors.

Includes a 10mm stud, copper adhesive and a grounding plug.

Description

Part Nr.

Grounding kit	30-552-5046
---------------	-------------

5. GROUNDING ACCESSORIES

5.1. Permanent monitor

Compact meter that can monitor the grounding of 2 operators and/or 2 ESD mats simultaneously. 3 colour LEDs indicate the status of the operator wrist-strap: high, low, safe.

Technical Data

- Bracelet detection limit: 35 MΩ
- Mat detection limit: 100 MΩ

Part Nr. : 61-200-0012

If one of the connections fails, the device emits an alarm and a visual signal

5.2. Connection from workbench to ground

a. Universal box

Part Nr. : 30-560-0039

Technical Data

- Snaps (4, 4.5, 7 and 10mm)
- Complete with 3 meter cord with eyelet
- Material: Yellow ABS
- Dimensions: 78 x 28 x 35 mm
- No resistance

- Universal grounding solution compatible with all existing wrist strap connections: banana plug, GSGS, snaps

b. L-Shape earth bonding bracket

Technical Data

- 3m of black cord, right output
- Material: Yellow ABS
- Dimensions: 110 x 16,5 x 33 mm
- Security resistance: 1 MΩ

10 mm stud	30-560-4010

Superior reliability for grounding operators

Technical Data

- Conductive bracelets
- $R_v < 1 \times 10^5 \Omega$
- Superior reliability
- Nickel free
- Male stud connection

IEC
61340
Compliant

c. Plastic wrist bands

- Hygienic washable wrist band
- Insulated external side and conductive internal side

Clean room compatible.

Technical Data

- Thermoplastic material
- $R_v < 1 \times 10^5 \Omega$
- Male stud connection
- Colour: Blue

IEC
61340
Compliant

Connection	Part Nr.
4 mm stud	30-560-0111
7 mm stud	30-560-0112
10 mm stud	30-560-0113

d. Dual cord wrist straps

Designed to operate with the workstation monitors.

IEC
61340
Compliant

Fabric

- Both sides are conductive
- Adjustable to any wrist size

Technical Data

- Non allergenic material
- $R_v < 1 \times 10^5 \Omega$
- Male stud connection
- Washable
- Colour: brown, polyester fiber

Metal

- Insulated external side and conductive internal side
- Conductive wrist band

Technical Data

- Nickel free
- $R_v < 1 \times 10^5 \Omega$
- Male stud connection

Part Nr. :
Size S : Part Nr. 30-560-3010
Size L : Part Nr. 30-560-3011

e. Disposable wrist band

IEC
61340

- For single use applications
- Adheres to any convenient electrical ground

Technical Data

- Non woven, conductive and aluminium film
- Length: 152 cm / width: 2.54 cm
- $R_v < 1 \times 10^6 \Omega$

Part Nr.: 30-560-0209

5.7. Hand lotion

- Moistens skin for better contact between the wrist band and the skin.
- Absorbed immediately, does not interfere with grip or dexterity.

6. EPA WASTE BINS

6.1. Waste bins

Black PP conductive waste bin

Features

- 13 liters
- Liquid compatible
- $R_v < 1 \times 10^5 \Omega$
- **Height:** 310 mm
- **Top diameter:** \varnothing 300 mm

Part Nr. : 41-094-2473

Black PP conductive waste bin

Features

- 40 liters
- Liquid compatible
- $R_v < 1 \times 10^5 \Omega$
- **Dimensions:** 330 x 235 x 530 mm

Part Nr. : 41-094-0110

Black PE conductive waste bin

Features

- 112 liters
- Dry waste only
- $R_s < 1 \times 10^5 \Omega$
- **Dimensions:** 400 x 400 x 700 mm
Customized sizes on request

Part Nr. : 23-172-3343b

Part Nr. With wheels: 23-172-3344

Black PP conductive waste bin

Features

- 240 liters
- $R_v < 1 \times 10^5 \Omega$
- **Dimensions:** 700 x 660 x 860 mm
- Handle raised position 1230mm
- Handle lowered position 1010mm

Part Nr. : 41-094-6017

6.2. Refuse bag trolley

Features

- $R_v < 1 \times 10^5 \Omega$
- **Dimensions:** 650 x 360 x 1000 mm
- Weight: 8 kg
- Material: 22 mm shiny zinc-coated tubing with rounded edges
- Max load: 50 kg

Part Nr. : 41-094-6017

compatible with 125L bag PN 41-095-0025

6.3. Waste bags

Pink PE low tribocharging bags to be used in waste bins. Typical surface resistance value: $R_s < 1 \times 10^{11} \Omega$.

8. CLEANING PRODUCTS

8.1. Liquid products

a. Floor stripper

Non-ammoniated, biodegradable no harsh odors. This stripper will not damage or dull flooring when used according to manufacturer's instructions. Non-streaking and low foaming.

Features

- Effective in hard or soft water
- Should be applied once a year
- **Capacity:** Bottle 3.75 liters

Part Nr. : 41-100-4010

b. Net-Stat™, antistatic cleaner

Net-Stat™ cleans and protects all surfaces. With its antistatic properties, it repels dust and stops the formation of static electricity.

Features

- Composition: isopropanol and actif tensio
- Daily usage
- **Capacity:** Spray 0.75 liters, Bottles 5L / 20L
- Ready to use

c. Cleaning product

Features

- A long-lasting and economical formula
- Non-toxic and non-corrosive
- Suitable for industrial clean rooms ISO 5 and above
- Formula: sodium and chloride free
- Cleanroom compatible
- **Capacity:** Bottle 95 cl

Part Nr. : 41-100-5001

8.2. Wipers

Cleanroom wiper containing carbon fibers

Designed for use in ESD sensitive environments.

Features

- Cleanroom compatible
- ESD properties
- 98% Polyester, 2% Carbon
- **Dimensions:** 9 x 9" (23 x 23cm)

IEC
61340
Compliant

Part Nr. : 41-100-1003

Wipers 55% cellulose, 45% polyester

Features

- Cleanroom compatible
- Low tribocharging
- Cleanliness : ISO 5
- **Dimensions:** 9 x 9" (23 x 23cm)

Part Nr. : 41-100-1301

Wipers 100% polyester

Features

- Good water and oil absorption
- Soft and comfortable, not scratching the surface
- Low tribocharging
- Cleanliness : ISO 5
- **Dimensions:** 9 x 9" (23 x 23cm)

Part Nr. : 41-100-1300

8.3. Sticky rolls

Sticky roll to avoid particle contamination.
Material: 100% silicone

Features

- Offering an excellent adhesive surface and durability, removing contaminating particles.
- Use with adhesive paper.
- Cleanroom compatible
- ESD properties
- Cleanliness : ISO 5

Description

Part Nr.

Sticky roll - 102 mm / 4"	41-099-6041
Sticky roll - 203 mm / 8 "	41-099-6045

8.4. Paper for sticky rolls

White adhesive paper with strong viscosity.

Dimensions: 330 x 240 – 50 films

Features

- Removes dust and particles
- High density surface glue

Part Nr. : 41-099-6049

8.5. ESD Safe brooms and dustpan Kit

a. Broom

Features

- Long broom with conductive brush head and a detachable Aluminium shaft
- ESD broom
- Brush head 400 mm

Part Nr. : 41-099-6009

b. Bench brush with soft hairs

Features

- **Length:** 360 mm
- **Hair length :** 67 mm
- **Hair surface:** 180 mm

Part Nr. : 41-099-0076

c. Safe broom and dustpan kit

Features

- Conductive PP broom head with a conductive aluminium shaft
- **Dimensions (Lxl):**
Broom 880 x 230 mm
Dustpan 900 x 260 mm

Part Nr. : 41-099-6052

8.6. Vacuum cleaners

Special field service and EPA mini vacuum cleaner (suction and blow options), to remove dust and debris from electronic equipment subject to contamination and static build up.

IEC
61340
Compliant

Features:

- Blowvac' cleaner – with suction and blow options (power controlled)
- Premium quality electronic component for reliability
- Conductive accessories including hard and soft nozzles and shoulder strap
- Special 1.2 liter multilayer filter system
- Low noise yet retaining excellent suction strength

Storage cabinets for small components.

25-305-4010

25-305-3015

Technical data:

- The design combines the use of a strong, conductive PP frame and galvanized steel shelves.
- Supplied with labels and connector for earth lead.
- Material : Conductive polypropylene
- Surface resistance $R_s: \leq 1 \times 10^4 \Omega$
- Colour: Black

- All cabinets can be wall mounted placed on bench top turntable, or simply free standing in the workshop.
- Available in 2 sizes with heights 290mm and 550mm.

Swivel plate for frictionless pivoting of any element placed on it's surface (components, cabinets).

Technical data:

- Max load : 100 kg
- Material: Stainless steel
- Colour: Slainless steel / Blue
- Volume resistance: $10^7 \Omega \leq R_v \leq 10^9 \Omega$

1.5. Eurostat conductive magazines

Designed to insert and remove printed circuit boards on production lines, conductive and ESD safe ($R_s < 1 \times 10^5 \Omega$) and compatible with most automatic component insertion machines. They are easily adjusted to PCB dimensions.

Technical data:

- Strong construction from thermoformed plastic with metal reinforcement
- Light in weight and extremely rigid
- Assembled using rivets and ultrasonic welding
- Each magazine is delivered with a partition
- The PCB cards are placed between the fixed partitions (10mm grooves) and the mobile partitions (grooves on both sides)
- Vertical pitch 10mm - Width adjustable to 5mm pitch
- Additional partition and covers on demand

IEC
61340
Compliant

Robust and light makes them easy to handle throughout the production facility.

1.6. Quickfill magazines

Strong injection moulded construction with metal reinforcement (top and bottom).

Technical data:

- Not subject to accidental change in width
- Partition is made of assembled plastic parts, the system provides better dimensional stability to large temperature variations
- Meant for 50 PCB's
- Slide guide slot depth: 3.5 mm
- Slide guide slot pitch: 10 mm

- Meet standard dimensions most frequently used on automated lines
- Standardized plates that fit most popular brands on the market

2.2. ESD safe document holder

Dissipative ESD safe document holder

Description	Part Nr.
A4 U model with side perforation	41-093-0005
A4 L model without side perforation	41-093-0015A

2.3. ESD safe pouches for document lamination

Perfect solution for all kind of papers, instructions, wall signs and notices within the EPA. Simply place your documents in the pouch and insert sealed edges into laminator

Thickness μm (+/- 10%) **80**

**IEC
61340
Compliant**

Technical data:

- Material: Polyester/EVA permanent static dissipative
- Density: 95 g/m²
- Elongation: MD 161% / TD 120% Roll
- Surface resistance Rs: < 1 x 10⁹ Ω
- Charge decay time (1000V to 100V): < 2 seconds

Format	Part Nr.
A4	41-090-6008
A3	41-090-6009

2.4. ESD safe quick release file

ESD safe transparent document holder for A4 documents.

Technical data:

- Material: permanently static dissipative PVC
- Dimension: suitable for A4 documents
- Surface resistance Rs: 1 x 10¹⁰ – 1 x 10¹¹ Ω
- Colour: Front and back cover transparent - Blue filing clip

Part Nr. : 41-093-0092

2.5. Clean room Paper

Designed for use in copy machines and printers, clean room compatible
Coated with a proprietary polymer formulation preventing fragmentation of individual cellulose fibers that would normally lead to particle generation and migration
Each package is wrapped and poly-bagged for added protection, suitable for cleanroom use.

Colour	Part Nr.
Blue	41-092-0010
White	41-092-0011

Technical data:

- Weight: 72 g/m²
- Thickness: 85 μm
- Charge generation: < 50 v/cm²
- Surface resistance Rs: < 1 x 10¹¹ Ω

2.6. Clip board

Dissipative plastic clip board.

Technical data:

- With metal clip
- Suitable for A4 documents
- Clean room compatible
- Surface resistance: $R_s < 10^8 \Omega$

IEC
61340
Compliant

Part Nr. : 41-090-6003

2.7. ESD safe flip over system

Technical data:

- **Base dimensions** : 19 x 19 cm
- **Height** : 35,5 cm
- Surface resistance $R_s < 1 \times 10^6 \Omega$

Technical Data

- Rs: $\leq 1 \times 10^{11} \Omega$

Can be supplied on demand with a plastic core for clean rooms.

4.4. Transparent adhesive

Permanently low tribo-charging and dissipative film to protect materials that can't be grounded

Technical data:

- Thickness: 80µm
- Elongation: $\leq 50\%$
- Surface resistance Rs: $1 \times 10^7 - 1 \times 10^{10} \Omega$
- Ground resistance Rv: $1 \times 10^7 - 1 \times 10^{10} \Omega$
- Shelf life: permanent
- Conforms to: ANSI/ESD S20.20 - 1999

Core diameter: 76 mm

TRAINING AUDIT & SERVICE

Eurostat, ESD Experts and voting member of the IEC/TC101 “electrostatics”, offers on site audits and product characterization.

1. TRAINING YOUR EMPLOYEES

As ESD sensitivity of products increases the production operators and production coordinators need to adapt to a very demanding technical environment. In order to make sure that the operators follow proper procedures, it is advised and required to provide professional ESD training.

Eurostat is a certified training institute (agreement number: 43390015239) and provides training with experts supervised by the French President of TC 101.

The training is offered in English or in French, 3 training levels are available.

Level 1

Attendees	Goals	Sessions
<ul style="list-style-type: none"> Operators Manufacturing support Management 	<ul style="list-style-type: none"> To understand why and how ESD damages and defects occur To have a clear view of the wide spectrum of risks, damages and defects in case of no-adherence or drift from the rules and means of prevention 	Approx. 3h30 (recommended period)

Level 2

Attendees	Goals	Sessions
<ul style="list-style-type: none"> Engineers Technicians management with engineering background 	<ul style="list-style-type: none"> To take care that all prevention rules are implemented and respected by all personnel working within or entering an EPA To be aware of the basic methods and tools currently used to make measurements in an EPA 	Approx. 4h30 (recommended period)

Level 3

Our training programs, which are continuously improved and updated, can be adapted to companies individual needs and tailored to suit your company and the ESD experience of your employees.

After each training session, a personalised certificate is presented to each attendee.

2. AUDIT

REPORTS

ESD Experts and voting member of the IEC/TC101 “electrostatics”, Eurostat offers on site audits and product characterisation.

2.1. Site Audit

GOALS **To highlight existing in-situ gaps**
with what is recommended through IEC 61340-5-1/2 international standard

To analyse and understand
any electrostatic issues in discussion with your technical representative

The site visit - Approx. 1 day

1 The site visit is a fact-finding visit in which our consultant surveys key parts of the site and the customer’s processes and procedures.

2 It is also an opportunity for you to highlight and discuss any particular areas of concern you may have.

For these reasons it is essential to make your on-site technical representative available to act as a guide and to be a technical support.

Electrostatic related measurements such as electrostatic field potential and resistance measurements are made where it is appropriate to check the status of equipment, processes, floors and other relevant items.

2.2. Characterization

GOALS **Define the Electrostatic features of your products**
with measurements performed in our laboratory to IEC.

Progress - delays on request

After estimating the time necessary to achieve your study (depends on the quantities and objectives of your demands), we will do some testing in our characterisation laboratory.

2.3. Report

The report gives some relevant electrostatic information and explanation of key aspects where possible. It typically records: details of our consultant’s findings including the results of any measurements, conclusions and specific recommendations and a list of literature and relevant standards that might be required for reference and further reading material if applicable.

3. TECHNICAL SERVICE AND INSTALLATIONS

Our Technical service centre ensures installation, maintenance and calibration of equipment, together with repairs during the guarantee period.

Range verification and calibration of electronic equipment can also be carried out.
